

BEGINNING TO END

CREATING FROM YOUR DESIGN OR OURS...

Reflecting you...

- ▶ Jewelry should reflect your style and personality. Your vision of a stunning piece can now be brought to life by the experts at MB Jewelry Design. Specializing in hand-crafted essentials for over 40 years, the trained staff at MB Jewelry is well versed in manufacturing jewelry based on your ideas, descriptions, and style.
- ▶ It all begins with an idea, and after sitting down with our qualified trained staff for a consultation we will turn your idea into a fully flushed-out sketch. The beginning of a one-of-a-kind piece. Once we get a feel for your vision and emerge with a final sketch, the physical process begins.
- ▶ We'll begin with carving the waxes. These replicas are made to the exact specifications of the sketch you helped create, ensuring that the final piece comes out a proper fit.

In the beginning... We carved the waxes...

What else can we do... More carving...

Construction...

- ▶ After the waxes are carved, they're cast in the metal of your choice, and then cleaned up and tailored to meet exact dimensions. Each nook and cranny of your custom piece is carefully edged, leaving not even the smallest area overlooked.

We start to clean up and begin to assemble ...

Handcrafted 14 karat white & yellow
gold...

From there, your stones are hand set, on-site by our expert diamond setter, who crafts the entirety of your item and then polishes accordingly.

The sparkle

The shine

We hand set the stones and begin polishing...

We hand polished and prepared to set the stones....

Tanzanite & Diamonds

In the end, your original design emerges just as you imagined! Your new piece is ready to be worn in all its grandeur. Pictured below is the finished two tone oval Tanzanite Pendant set with Diamonds.
